INTRODUCTION

EASINGTON EMERGENCY PROCEDURE PLAN

Emergencies happen. There may be a time when you might be affected by an emergency, but your life is not in immediate danger. During such a time, you will need to know how to help yourself and those around you. The Parish Council has drawn up this plan to help deal with a major incident which may occur in the future.

'By becoming more resilient, you and your community can complement the work of local emergency responders and reduce the impact of an emergency on your community both in the short and long term.' (www.gov.uk)

Objectives of this Emergency Procedure Plan:

- To establish a community emergency co-ordinators' team that will coordinate the community response and liaise with the emergency services / local authorities as appropriate.
- To identify actions required to minimise the harm from identified hazards or threats.
- To establish a means of identifying vulnerable people in the community with a view to supporting them in an emergency.
- To identify resources in the community that would be available to minimise the severity of the emergency.
- To establish key contact details for the emergency services and local authorities, the Local Community Emergency Co-ordinators and key community resources.

In the event of a major incident in or near the parish, Easington's Community Emergency Co-Ordinator's will activate the Plan after contacting the appropriate authorities.

TRIGGER – NOTIFICATION OF INFECTED PREMISES

The risks of disease being spread by those seeking recreational access to the countryside are exceedingly small and can be reduced further by avoiding direct contact with animals.

In the event of a disease outbreak, there will be a presumption in favour of access to the countryside, subject to veterinary risk assessment. However, restriction in the movement of animals, people, and vehicles on and around infected site/premises may be put in place. There may be disinfectants that need to be applied when entering / leaving affected premises.

1) Animal Disease

These diseases have a serious economic impact for the farmer and will cause fluctuations in price of the meat, and animal products.

There may be restrictions put on movement around the infected premises in zones.

i). Diseases that affect only the animal. Such as Foot and Mouth, Blue Tongue, and Classical Swine Fever, etc.

Access to and from infected flocks/herds will be restricted.

ii) Zoonotic Diseases - Diseases that can pass from animals to humans, such as Avian Influenza, E. coli, Salmonella, etc. Access to the area and to animals will be restricted for infection control.

2) Parish Council Actions:

Obtain up to date information from:

Department for Environment, Food and Rural Affairs.

<https://www.gov.uk/government/organisations/department-for-environment-food-rural-affairs>
